

DAMIAN FASHER

DIRECTOR

CAREER OVERVIEW

Damian is a Director and experienced project manager leading projects from the early briefing stages through to final delivery.

Since completing a Bachelor of Science, with Honours in Construction Management and Economics at Curtin University of Technology in 1998, Damian has gained a wide range of local and international experience working on a variety of projects including residential and commercial land development, marina and waterside developments, airport infrastructure and facilities, schools, medical facilities, bridges and cultural centres.

Key skills include the development of project visions, objectives and key performance indicators, stakeholder engagement, facilitation of client and authority decision making for complex projects, creation, coordination and motivation of specialist teams specifically formed for each project, innovative strategic direction guiding projects towards their vision and problem solving.

Damian has also spent considerable time studying and implementing value management techniques at all levels. His role has varied from master planning and business case preparation to design, tender and project delivery including implementation of complex sustainability community consultation, public relations and marketing strategies.
